Direct TV Capabilities

If the phrase “**Feature Creature**” describes you then you will want Direct TV!

Here's why

- The **Compression setting** in the Direct TV HD Tuner is the highest in the industry, resulting in more vibrant colors and a clearer picture. Simply put a 1080 picture on a Direct TV system is the most brilliant in the industry.
- The **Whole Home DVR** service that if offered allows viewing on all TV's rather than just two.
- **Score Guide** shows all game scores on the screen simply by pushing the Red Button.
- **Quick Tune** allows channel shortcuts to be programmed on the remote.
- **Double Play** allows you to switch between two shows and picks up where you left off. Its limitation is that it only works with a 30 minute window. Its also not recorded on the DVR. But if you switch between shows, its a fantastic feature.
- They have developed **TV Apps** for the internet connected television. So you can program things like live feeds to your internet connected HD/DVR.
- **Smart Search** allows you to search all recordings, including services like YouTube and Hulu for programming and recording.
- **DirectTV Cinema** gives you access to 6000 free shows by simply connecting the internet to your receiver. You also have access to new release movies 28 days faster than Netflix or RedBox. There is a fee for each movie, usually \$4.99.
- **NBC Lookback** gives you 72 hours to go back and look at that network's programming if you missed your favorite show.

It will take some time and patience to learn all these features, but the inner geek in all of us will help us figure it out.
